INDEPENDENT CERTIFIED PUBLIC ACCOUNTANT'S REPORT

To the shareholders

AL – Fares National Company for Investment and Export (P. L .C)

Report on auditing the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of AL– Fares National Company for Investment and Export (P.L.C), which comprise of the consolidated statement of financial position as of December 31, 2020, and the related consolidated statements of comprehensive income, Statement of owners' equity and consolidated statement of cash flows, for the year then ended, notes to the consolidated financial statements and a summary of significant accounting policies and other explanatory information.

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated statement of financial position of AL– Fares National Company for Investment and Export. (P.L.C) as of December 31,2020, and its consolidated financial performance and cash flows for the year then ended are in accordance with International Financial Reporting Standards.

Basis for Opinion

We conduct our audit in accordance with International audit standards. Our responsibilities under those standards are further described in Auditor's Responsibilities for the audit of the consolidated financial Statements. We are independent of the company in accordance with International Standard Board Code of Ethics for professional accountants ("the code") and we have fulfilled our other ethical responsibilities in accordance with the code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide basis for our audit opinion.

Key audit matters

Key audit matters, According to our professional judgment, are matters that had the most significant importance in our auditing procedures that we performed to the consolidated financial statement the basic auditing matters have been addressed in our auditing workflow to consolidated financial standards as we do not express separate opinion.

Basic auditing matters	The following is a description of our auditing procedures
<p>Goodwill and developed computer software In accordance with International Financial Reporting Standards, the Company has to assess goodwill, developed computer software and impairment testing, where annual impairment is a significant audit matter due to the complexity of the accounting requirements and general judgments required in determining the assumption to be used in estimating the recoverable amount. The recoverable amount of the cash-generating units, which is based on the value in use or the fair value, less costs to sell, whichever is higher, is calculated from discounted cash flow models. These models use several basic assumptions including estimates of future sales volume and prices, Operating costs, end-to-end value growth rates and weighted average cost of capital.</p>	<p>Goodwill and developed computer software The auditing procedures included evaluating the assumptions and methodologies used by the Company, particularly those relating to the growth of expected revenues and profit margins. We have also emphasized on the adequacy of the Company's disclosure of those most sensitive assumptions used in the impairment test, which has a significant impact in determining the recoverable amount of goodwill and developed computer programs, as a result, the administration conduct studies to test the impairment in goodwill annually and based on a study test the impairment for 2020, it shows that there is no impairment in goodwill and developed computer software amounting to JD 17,519,760 as of December 31, 2020.</p>
<p>Unbilled revenues In accordance with International Financial Reporting Standards, the Company has to periodically review the process of calculating the unbilled revenues and ensure that it is collected in subsequent periods. The management estimates the unbilled revenues through the use of assumptions and estimates and, due to their importance, it's considered one of the significant audit risks.</p>	<p>Unbilled revenues The audit procedures included the control procedures used in the verification of existence and completeness, the review of a sample of the unbilled revenues, the conformity with the contracts and the confirmations, and the assurance of their collection in the subsequent period and the confirmation of their validity by assessing the management assumptions, considering the available external information on the risks of recognition of unbilled revenues , We have also evaluated the adequacy of the company's disclosures about it.</p>
<p>Accounts receivable & checks under collections In accordance with International Financial Reporting Standards, the Company is required to review the allowance for doubtful account as IAS 9. Management estimates impairment in receivables through the use of assumptions and estimates and, because of their significance, it's considered an important audit risk.</p>	<p>Accounts receivable and checks under collections The auditing procedures included control procedures used by the Company for collecting accounts receivables and checks under collection, verifying a sample of clients' accounts through direct confirmations, it has been asserted that the account receivable impairment provision is adequate through evaluating the management assumptions, considering the available external information about account receivable risks, we also evaluated the adequacy of the company disclosure about the important estimation in concluding the impairment provision of accounts receivable.</p>

Other Matter

As a result of the discontinuance of the business and the operational activity of Gulf Electronics Technical Solutions Limited Company (Saudi Arabia), the Board of Directors has decided not to consolidate their financial statements with the Company's financial statements. , And this investment is presented in accordance with the requirements of IFRS 5 "Non-current Assets Held for Sale and Discontinued Operations"

Other information

The management is responsible for other information which includes other information reported in the annual report, but not included in the consolidated financial statements and our audit report on it.

Our opinion does not include these other information, and we do not express any assertion over it.

Regarding our audit on consolidated financial statements, we are obliged to review these other information, and while that, we consider the compatibility of these information with their consolidated financial statements or with the knowledge that we gained through audit procedure or if it seems to contain significant errors. If we detected an existence of significant errors in the information, we are obliged to report this fact. Regarding this, we have nothing to report.

Management and individuals responsible of governance about the financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards. And for such internal control, management is determined to be important to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, the Management is responsible for assessing the Company's ability to continue as a Going Concern, disclosing, as applicable, matters related to Going Concern and using the Going Concern basis of accounting. Unless the management either intend to liquidate the company or to cease operations or have no realistic alternative but to do so.

Individuals responsible of governance are responsible of supervising the preparation of consolidated financial statements.

Certified public accountant responsibility

Our objective is to obtain reasonable assurance about whether the Financial Statements are free from material misstatement whether due from error or fraud and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International audit standards will always detect a material misstatement even when it exists. Misstatements can arise from fraud or error and or considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decision of users taken on the basis of these consolidated Financial Statements.

As part of an audit in accordance with The International Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Management.
- Conclude on the appropriateness of the Management's use of the Going Concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated Financial Statements or, if such disclosures are inadequate, we will modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our Auditor's Report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated Financial Statements, including the disclosures, and whether the consolidated Financial Statements represent the underlying transactions and events in a manner that achieves Fair Presentation.

We communicated with audit committee, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Legal requirements report

The Company maintains proper books of accounts and the accompanying consolidated financial statements and the consolidated financial statements contained in the report of the board of directors in accordance with the proper books of accounts and we recommend to the General Assembly to approve them.

**AL – FARES NATIONAL COMPANY FOR INVESTMENT AND EXPORT
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
YEAR ENDED DECEMBER 31, 2020
(EXPRESSED IN JORDANIAN DĪNAR)**

Basis of consolidation financial statements

The Consolidated Financial Statements consisting of The Financial Statements of Al – Fares National Company for Investment and Export Company (Public Shareholding Company) And The Subsidiaries Controlled By The Company.

Control is achieved where the Company:

- Ability to exert power over the investee.
- Exposure, or rights, to variable returns from its involvement with the investee.
- Ability to exert power over the investee to affect the amount of the investor's returns.

The Company reassesses whether or not it controls an investee, or not. If facts and circumstances indicate that there are changes to one or more of the three elements of control described in the accounting policy for subsidiaries above.

When the Company has less than a majority of the voting, The Company shall have control over the investee when the voting rights sufficient to give it the ability to direct relevant activities of the investee individually.

When The Company reassesses whether or not it controls an investee, it considers all the relevant facts and circumstances which includes:

- Size of the holding relative to the size and ownership of other vote holders
- Potential voting rights, others vote-holders, and Other parties
- Other contractual rights
- Any additional facts and circumstances may indicate that the company has, or does not have, the current ability to direct the activities related to the time needed to make decisions, including how to vote at previous shareholder's meetings.

The consolidation process begins when the company's achieve control on the investee enterprise (subsidiary), while that process stops when the company's loses control of the investee (subsidiary). In particular revenues and expenses of subsidiaries acquired or disposed of during the year are included in the consolidated income statement, and the consolidated comprehensive income statement from the effective date of acquisition and up to the effective date of which it loses control of a subsidiary Company.

The profit or loss and each component of other comprehensive income is distributed to the owners of the parent and to the non-controlling interests, total comprehensive income to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balances.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the parent company.

All intra-entity transactions, balances, income and expenses are eliminated in full on consolidation.

(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
YEAR ENDED DECEMBER 31, 2020
(EXPRESSED IN JORDANIAN DINAR)**

Financial assets

Classifications

The Company classifies its financial assets into the following categories: financial assets at fair value through income statement, and receivables. Such classifications are determined based on the purpose for which these financial assets were acquired.

The management determines its classifications of the financial assets at initial recognition.

(A) Financial assets at fair value through income statement

Financial assets at fair value through income statement are financial assets held for trading. A financial asset is classified under this category if it is purchased primarily to be sold in a short period of time. Such assets are classified in this category under current assets, if the Company expects to sell them within 12 months from the date of the statement of financial position, otherwise they are classified as non-current assets.

(B) Receivables and loans

Receivables are financial assets (other than financial derivatives) with fixed or determinable payments that are not included in the financial market. These assets are classified as current assets unless they have maturities over 12 months after the statement of financial position date, as these are classified as non-current assets.

Recognition and measurement

Purchases and sales of financial assets are recognized on the trade-date – the date on which the Company commits to purchases or sell the asset. Investments are recognized at fair value while costs associated with purchases and sales are recognized income statement.

Impairment of financial assets

The Company reviews stated values on financial assets at the date of the statement of financial position determine whether objective indications of their impairment exist, individually or in the aggregate if such indications exist, recoverable amount is estimated to determine impairment.

The criterion that the Company uses to determine that there is objective evidence of an impairment loss includes:

- Significant financial difficulty of the debtor.
- A breach of contract, such as a default or delinquency in interest or principal payments.
- The Company, for economic or legal reasons relating to the debtors financial difficulty, granting the debtor a concession that the lender would not otherwise consider.
- It becomes probable that the debtor will enter bankruptcy or other financial reorganization.
- The disappearance of an active market for that financial asset because of financial difficulties.

**AL – FARES NATIONAL COMPANY FOR INVESTMENT AND EXPORT
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
YEAR ENDED DECEMBER 31, 2020
(EXPRESSED IN JORDANIAN DINAR)**

- Observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, including:

- (1) Adverse changes in the payment status of debtors in the portfolio.
- (2) National or local economic conditions that correlate with defaults on the assets in the portfolio.

The Company first assesses whether objective evidence of impairment exists.

For receivables category, the amount of the loss is measured as the difference between the assets carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial assets original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognized in income statement.

If, in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the reversal of the previously recognized impairment loss is recognized in income statement.

Reclassifications

If the business model under which the Company holds financial assets changes. The financial assets affected are reclassified. The classification and measurement requirements related to the new category apply prospectively from the first day of the first reporting period following the change in business model that results in reclassifying the Company's financial assets. During the current financial year and previous accounting period, there was no change in the business model under which the Company holds financial assets and therefore no reclassifications were made

Impairment

IFRS 9 replaces the “incurred loss” model in IAS 39 with an expected credit loss model (ECLs). The Company recognizes loss allowance for expected credit losses on the following financial instruments that are not measured at FVTPL

- Cash and bank balances;
- Trade and other receivables;
- Due from related party.

With the exception of purchased or originated credit impaired (POCI) financial assets (which are considered separately below), ECLs are required to be measured through a loss allowance at an amount equal to:

- 12 Month ECL, i.e. lifetime ECL that results from those default events on the financial instrument that are possible within 12 months after the reporting date(referred to as stage1); or
- Full lifetime ECL, i.e. Lifetime ECL that results from all possible default events over the life of the financial instruments, (referred to as stage2 and stage3).

**AL – FARES NATIONAL COMPANY FOR INVESTMENT AND EXPORT
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
YEAR ENDED DECEMBER 31, 2020
(EXPRESSED IN JORDANIAN DINAR)**

A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial Instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL.

The Company has elected to measure loss allowances of cash and bank balances, Trade and other receivables, and due from a related party at an amount equal to life time ECLs

ECLs are probability-weighted estimate of the present value of credit losses. These are measured as the present value of the difference between the cash flow to the Company under the contract and the cash flows that the Company expects to receive arising from weighting of multiple future economic scenarios. Discounted at the asset's EIR.

Loss allowance for financial investments measured at amortized costs is deducted from gross carrying amount of assets. For debt securities a FVTOCI, the loss allowance is recognized in the OCI, instead of reducing the carrying amount of the asset.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue costs or effort. This includes both quantitative and qualitative including forward-looking information.

For certain categories of financial assets, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Company's past experience of collecting payments, an increase in the number of delayed payments in the portfolio as well as observable changes in national or local economic conditions that correlate with default on receivables.

Impairment losses related to cash and bank balances, trade and other receivables and due from a related party, are presented separately in the statement of income and other comprehensive income

The Company considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of the grade of the investment.

Measurement of ECL

The Company employs statistical models for ECL calculations. ECLs are a probability-weighted estimate of credit losses. For measuring ECL under IFRS 9, the key input would be the term structure of the following variables.

- Probability of default (PD);
- Loss given default (LGD); and
- Exposure at default (EAD).

These parameters will be derived from our internally developed statistical models and other historical data. They will be adjusted to reflect forward – looking information.

**AL – FARES NATIONAL COMPANY FOR INVESTMENT AND EXPORT
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
YEAR ENDED DECEMBER 31, 2020
(EXPRESSED IN JORDANIAN DINAR)**

Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial assets have occurred. Credit-impaired financial assets are referred to stage 3 assets. At each reporting date, the Company assesses whether financial assets carried at amortized costs and debt securities at FVTOCI at credit-impaired. A financial asset is credit impaired when one or more events that have a detrimental impact in the estimated future cash flows of the financial asset have occurred.

DE-recognition of financial assets

The Company de-recognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity .If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On DE recognition of a financial asset measured at amortized cost or measured at FVTPL, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss.

On DE recognition of a financial asset that is classified as FVTOCI, the cumulative gain or loss previously accumulated in the cumulative changes in fair value of securities reserve is not reclassified to profit or loss, but is reclassified to retained earnings.

Presentation of allowance for ECL are presented in the financial information

Loss allowances for ECL are presented in the financial information as follows:

-For financial assets measured at amortized cost (loans and advances, cash and bank balances): as a deduction from the gross carrying amount of the assets.

- For debt instruments measured at FVTOCI no loss allowance is recognized in the consolidated statement of financial position as the carrying amount is at fair value. However, the less allowance is included as part of the revaluation amount in re-evaluation reserve and recognized in other comprehensive income.

Critical judgments in applying the Company's accounting policies in respect of IFRS 9

Business model assessment: Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how Company's of financial assets were managed together to achieve a particular business objective. This assessment includes judgments reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. Monitoring is part of the Company's continues assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets.

Significant increase of credit risk

ECLs are measured as an allowance equal to 12-month ECL for stage1 assets, or lifetime ECL assets for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial recognition. IFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased the Company takes into account qualitative and quantitative reasonable and supportable forward looking information.

(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
YEAR ENDED DECEMBER 31, 2020
(EXPRESSED IN JORDANIAN DINAR)**

Establishing Company s of assets with similar credit risk characteristics

When ECLs are measured on a collective basis, the financial instruments are Company collected on the basis of shared risk characteristics (e g, instrument type, credit risk grade, collateral type, date of initial recognition, remaining term to maturity, industry, geographic location of the borrower, etc.). The Company monitors the appropriateness of the credit risk characteristics on an ongoing basis to assess whether they continue to be similar. This is required in order to ensure that should credit risk characteristics change there is appropriate re-segmentation of the assets. This may result in new portfolios being created or assets moving to an existing portfolio that better reflects the similar credit risk characteristics of that Company of assets. Re-segmentation of portfolios and movement between portfolios is more common when there is a significant Increase in credit risk (or when that significant increase reverses) and so assets move from 12-month to lifetime ECLs, or vice versa, but it can also occur within portfolios that continue to be measured on the same basis of 12month or lifetime ECLs but the amount of the ECLs changes because the credit risk of the portfolios differ.

Models and assumptions used

The Company uses various models and assumptions in measuring fair value of financial assets as well as in estimating ECL. Judgment is applied in identifying the most appropriate model for each type of asset, as well as for determining the assumptions used in these models, including assumptions that relate to key drivers of credit risk.

Key sources of estimation uncertainty in respect of IFRS 9

The following are key estimations that the management has used in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognized in consolidated financial statements.

Establishing the number and relative weightings of forward-looking scenarios for each type of product \ market determining the forward looking information relevant to each scenario: When measuring ECL the Company uses reasonable and supportable forward looking information, which s based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

Probability of Default

PD constitutes a key input in measuring ECL. PD is an estimate of the likelihood of Default likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

Loss Given to Default

LGD is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Revenue recognition

Revenue is measured at an amount that reflects the allowances that an entity expects to receive in exchange for transferring goods or services to a customer, with the exception of sums collected on behalf of other parties. The company recognizes revenue upon fulfilling every service obligation.

Separate selling prices are determined based on the observable price at which companies sell products and services on a separate basis. For items that are not sold separately, the Company estimates separate sale prices using other methods.

The Group recognizes revenue from the following main sources:

Major operations

Revenue represents amounts due in respect of services rendered during the year measured at the fair value of the consideration received or due, net of discounts.

Revenue is recognized over time when providing services.

If the services are provided less than one arrangement in different reporting periods, the corresponding allowance will be allocated based on the contracts signed with clients.

Other income

The company recognizes revenue when the amount of revenue can be measured reliably; it is probable that future economic benefits will flow to the entity and when specific criteria for the company's activities are met.

Contract assets and liabilities

The Company has determined that contract assets and liabilities are to be recognized at the performance obligation level and not at the contract level and both contract assets and liabilities are to be presented separately in the financial statements. The Company classifies its contract assets and liabilities as current and non-current based on the timing and pattern of flow of economic benefit.

Expenses

Selling and marketing expenses mainly comprise of costs incurred in the marketing and sale of the Company's products. All other expenses are classified as general and administrative expenses.

General and administrative expenses include both direct and indirect costs not specifically part of production costs as required under generally accepted accounting principles. Allocations between general and administrative expenses and cost of sales are made on a consistent basis when required.

Cash and cash equivalents

Cash and cash equivalent include cash, demand deposits, and highly liquid investments with original maturities of three months or less.

Account receivables

Receivables are stated at their net recoverable amount, and a provision for impairment of receivables is made based on a full review of all balances at the end of the year, and the outstanding debts are written off in the period in which they are identified.

(PUBLIC SHAREHOLDING COMPANY)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
YEAR ENDED DECEMBER 31, 2020
(EXPRESSED IN JORDANIAN DINAR)

Accounts payable and accruals

Accounts payable are stated at the obligation amounts for received services and goods, whether billed by the suppliers or not.

Joint ventures

The Joint venture is the operation that include using assets and other resources for the parties involved in the coalition rather than establishing a company or any financial structure separate from the coalition parties themselves .Each party of the coalition use his property and equipment and incur his own expenses and obligations and provide his own funding, the joint venture contract provide the method which enable to split the revenue from joint contract and any expenses incurred jointly between coalition parties, the consolidated financial statement include the Company’s share from joint venture business results using the equity method.

Inventories

Inventories are stated at lower of cost or market using (FIFO) inventory valuation method.

Investments in developed computer programs

The fair value of the computer program resulting from acquisition of subsidiaries were reassessed based on the recoverable amount , if the value is less than the book value, it would be reduced to recoverable amount, Which are measured based on the value in use, and the impairment value is recognized in the income statement. This impairment appears in the consolidated income statement.

Goodwill

Goodwill arising on the acquisition of a subsidiary or jointly controlled entity represents excess of acquisition cost over the Company's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of the jointly controlled entity recognized as at the date of purchase. Goodwill is initially recognized as an asset on a cost basis and is subsequently measured at cost less accumulated impairment, if any.

At the exclusion of a subsidiary Company, the value of goodwill allocated to them to determine the gain or loss resulting from the exclusion.

Property and equipment

Property and equipment are stated at cost less accumulated depreciation and impairment if exist. Expenditures on maintenance and repairs are expensed, while expenditures for enhancement and improvement are capitalized. Depreciation is provided over the estimated useful lives of the applicable assets using the straight line method. The estimated rates of depreciation of the principal classes of assets are as follows:

	Annual depreciation rate
Machinery and Computers software	15-25 %
Furniture fixture, and Decorations	10-15 %
Vehicles	15%
Tools and equipment	15%
Books	20%

The review of the useful life and depreciation method is done on a regular basis to ensure that the depreciation method and period match with the expected economic benefits of property and equipment.

**AL – FARES NATIONAL COMPANY FOR INVESTMENT AND EXPORT
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
YEAR ENDED DECEMBER 31, 2020
(EXPRESSED IN JORDANIAN DINAR)**

Impairment test is performed for property and equipment in the consolidated statement of financial position when any events or changes occur in circumstances that show that this value may not be recoverable. In case of any indication of impairment, impairment losses are calculated depending on the impairment policy of declining the value of the assets.

When any subsequent disposal of property and equipment, the value of the gains or losses arising are recognized, this represents the difference between the net disposal proceeds and the value that appears out of property and equipment in the consolidated balance sheet, gross profit and loss.

Income tax

The company is subject to Income Tax Law and its subsequent amendments and the regulations issued by the Income Tax Department in the Hashemite Kingdom of Jordan and provided on accrual basis, Income Tax is computed based on adjusted net income. According to International Accounting Standard number (12), the company may have deferred taxable assets resulting from the temporary differences between the accounting value and tax value of the assets and liabilities related to the provisions, these assets are not shown in the financial statements since it's immaterial.

Leasing

Lease contracts are classified as capital leases if the lease results in a material transfer of the property benefits and risks related to the asset in question to the lessee. Other leases are classified as operating leases.

Rents are recognized as a right to use asset and a corresponding liability on the date that the leased asset is available for company use. Each lease payment is distributed between the obligation and the cost of the financing. The finance charge is charged to the profit or loss over the term of the lease in order to obtain a fixed periodic rate for the outstanding leader on the remaining balance of the liabilities for each period. Depreciation is calculated on the assets of the right to use over the useful life of the asset or the lease term, whichever is shorter, by the straight-line method.

Operating lease obligations are measured at the present value of the remaining lease payments, as lease payments are discounted using the interest rate included in the lease. If this rate cannot be determined, the additional borrowing rate of the lessee is used, which is the rate the tenant has to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Rentals due under short-term operating leases and low-value assets are charged to the statement of comprehensive income during the period of the operating lease using the straight-line method. Short-term operating lease contracts are leases of 12 months or less.

Provisions

The provision had been formed, when the company has a present obligation (legal or expected) from past events which its cost of repayment considers accepted and it has ability to estimate it reliably.

The provision had been measured according the best expectations of the required alternative to meet the obligation as of the statement of financial position date after considering the risks and not assured matters about the obligation. When the provision had been measured with the estimated cash flows to pay the present obligation, then the accounts receivable had been recognized as asset in case of receipt and replacement of the amount is certain and it able to measure the amount reliably.

Segment reporting

The business sector represents a group of assets and operation engaged together in providing product or services subjected to risks and returns that are different from those of other business sectors, which are measured according to the reports that are used by the executive director and the main decision – makers in the Company.

Geographical segment is associated in providing products in particular economic environment subject to risks and returns that are differed from those for sectors to work in economic environment.

Offsetting

Financial assets and financial liabilities are offset, and the net amount is reflected in the consolidated statement of financial position only when there are legal rights to offset the recognized amounts, and when intends to settle them on a net basis, or assets are realized and liabilities settled simultaneously.

Foreign currency translation

Foreign currency transactions are translated into Jordanian Dinar at the rates of exchange prevailing at the time of the transactions. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the exchange rates prevailing at that date. Gains and losses from settlement and translation of foreign currency transactions are included in the statement of income.

Critical accounting judgments and key sources of estimation uncertainty

The preparation of consolidated financial statements requires management to make judgments estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing these consolidated financial statements, the significant Judgments made by management in applying the Company accounting policies and the key sources of estimation uncertainty were the same as those that applied to the audited annual financial consolidated statements.

Statutory reserve:

In accordance with the Companies' Law in the Hashemite Kingdome of Jordan and the Company's Article of Association, the Company has established a statutory reserve by the appropriation of 10% of net income until the reserve equals 25% of the capital. However, the company may, with the approval of the General Assembly to continue to deduct this annual ratio until this reserve is equal to the authorized capital of the Company in full. This reserve is not available for dividend distribution; The General Assembly is entitled to decide, in its unusual meeting, to amortize its losses by the accumulated statutory reserve if all other reserves pay off, to rebuild it again in accordance with the law.

Voluntary reserve:

In accordance with the Companies' Law in the Hashemite Kingdome of Jordan and the Company's Article of Association, The Company can establish a voluntary reserve by an appropriation no more than 20% of pre-tax net income. The company's Board of Directors resolved to allocate 20% of the net income during the year. This reserve is not available for dividend distribution till the approval of the Company's General Assembly.
