Independent Auditors' Report

To general assembly

The First Finance Company

Report on the Audit of the consolidated Financial Statements

Auditing scope

We have audited the accompanying Consolidated financial statements of **The company** which comprise:

- consolidated statement of financial position as at 31 December 2024.
- Statement of consolidated comprehensive income.
- statement of consolidated changes in owners' equity
- statement of consolidated cash flows for the year then ended.
- notes, comprising significant accounting policies and other explanatory information.

the opinion

In our opinion, the accompanying consolidated financial statements **present fairly**, in all material respects, the consolidated financial position of the Company as at 31 December 2024, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the consolidated Financial Statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matters

Without qualified, as stated in note No. (8) about the attached consolidated financial statements, accounts receivable – financing activities as on December 31, 2024 include investment plots of land worth JD 4,110,223 that are not registered in the name of the company, but are registered in the name of persons under an agreement and in the name of related party. the company's ownership of these lands is proven through first- class mortgage bonds in favor of first finance company.

the independency

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Continued - Independent auditors' Report of the First Finance Company for the year ended on December 31, 2024

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

• Provision of expected credit losses

Due to the discretionary nature in the process of calculating the provision for expected credit losses and the importance of the judgments and assumptions used in classifying the receivables from financing activities in the various stages stipulated in International Financial Reporting Standard No. (9) and determining the requirements of the relevant provisions, so this topic was considered an audit matter important.

The receivables from financing activities, after deducting the unrealized returns, amounted to JD 41,658,982 and a provision for expected credit losses of JD 19,085,915 was calculated as of December 31, 2024.

The disclosures related to the allowance for expected credit losses are set out in Note No. (7) on the financial statements.

The audit procedures included the:

- Studying the appropriateness of the approach to applying IFRS 9, financial instruments, and practical methods applied to determine the provisions against exposures classified as within the stages (first, second and third), and we evaluated the reasonableness of the basic assumptions and the adequacy of the data used from the company.
- Verify the suitability of the company's determination of the significant increase in credit risk and the basis resulting from the classification of exposures into different stages, and verify a sample of exposures on the appropriateness of determining the exposure when a default occurs and the probability of a default and loss in the event of default. In repayment, used in calculating expected credit losses.
- Verify the correctness of the completeness of receivables from financing activities included in the calculations of expected credit losses, and examine a sample of receivables from financing activities for exposures that have been individually identified for impairment and classified under stage (3) and management's estimate of future cash flows and assess its reasonableness.
- Reviewing the adequacy of the company's disclosures about the allowance for expected credit losses, note (7), as well as the disclosure of accounting policies and estimates about the allowance for expected credit losses in note (5) about the financial statements.

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated financial statements and our auditors' report thereon. We expected that we will give the annual report after our report.

Continued - Independent auditors' Report of the First Finance Company for the year ended on December 31, 2024

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information when its available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's consolidated financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

Continued - Independent auditors' Report of the First Finance Company for the year ended on December 31, 2024

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists,

We are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

The Company has proper accounting records which are, in all material respects, consistent with the accompanying consolidated financial statements, accordingly, we recommend approving these consolidated financial statements by the general assembly.

First Finance Company

Public shareholding company

Amman - The Hashemite Kingdom of Jordan

Notes to the consolidated financial statements

1- Company's registration and objectives

First Finance Company was established and registered as a public limited shareholding company under No. (390) on March 5, 2006 with a capital of 50 million shares / Jordanian Dinars, and the company started its operations as of September 3, 2006. In accordance with the decision of the General Assembly of Shareholders in its extraordinary meeting held on April 14, 2011, and after the approval of the Ministry of Industry and Commerce on September 22, 2011, the company reduced its authorized and paid up capital by 15 million shares/dinars by amortizing the accumulated losses. Consequently, the company's capital became 35 million shares / dinars instead of 50 million shares / dinars, and the capital was reduced on August 29, 2024 by 800 thousand shares / dinars with a balance of treasury shares to become 34,200,000 shares / dinars (Note 19).

One of the company's objectives is to carry out financing for natural and legal persons in accordance with the provisions of Islamic law, and this includes, for example, direct financing of consumer and durable goods, real estate financing, including financing of lands, housing, buildings and constructions, and financing the establishment of private and public projects. .

It also aims to mediate between banks, local lending and financing institutions, international and regional development funds and banks, and between the beneficiaries of the programs of these institutions.

It also aims to manage the money of others in the financial and investment fields in exchange for specific fees or shares of the returns of these funds, as well as the management of property, real estate and other movable and immovable properties owned by others.

The consolidated financial statements were approved by the board of directors at their meeting held on **February 6, 2025**, these financial statements needs subject to the approval of the general assembly of shareholders .

2- Basis of preparation of financial statements

The financial statements of the company have been prepared in accordance to International Financial Reporting Standards .

The financial statements have been prepared on historical cost except financial assets and liabilities which appears on fair value .

The financial statements are presented in Jordanian Dinars (JD) which is the company's functional and presentation currency .

First Finance Company
Public shareholding company
Amman - The Hashemite Kingdom of Jordan
Notes to the consolidated financial statements

3- Basis of consolidation of the financial statements

- The consolidated financial statements consist of assets , liabilities , revenues & expnses of **First Finance Company** and **1** subsidiary as follows :

Company's name	Legal form	Date of control	Capital	Ownership rate	Company's share of subsidiary's profit	Investment's net book value
		JD	JD	%	JD	JD
Sukok Leasing Company	L.L.C	April 19,2017	500,000	100	(113,018)	1,124,997

- Summary for subsidiary's assets & liabilities & revenues & profit :

Company's name	Assets	Liabilities	Revenues	Profit for the year
	JD	JD	JD	JD
Sukok Leasing Company	2,000,684	1,107,047	110,800	(113,018)

Control realized when company has ability of control the financial and operation policies for subsidiaries for obtained benifets from its activities .

Subsidiaries' income results is being consolidated in statement of consolidated income from date of control up to stop that control on subsidiaries when the actual control on subsidiaries move to company or from company .

Minority interests represents part non owned by company from subsidiaries' owner's equity , minority interests stated in net company's assets as a separated item from shares owner's equity of the company .

First Finance Company

Public shareholding company

Amman - The Hashemite Kingdom of Jordan

Notes to the consolidated financial statements

4- Use of estimates

The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amount of financial assets and liabilities and disclosure of contingent liabilities . These estimates and assumptions also affect the revenues and expenses and the resultant provisions and particular , considerable judgement by management is required in the estimation of the amount and timing of future cash flows . Such estimates are necessarily based on assumptions about several factors involving varying degrees of judgment and uncertainty and actual results may differ, resulting in future change in such provisions .

Management believe that the estimates are reasonable and are as follows :

- Management evaluates its investments for impairment on a regular basis where there is a prolonged decline , Management estimates the value of impairment and the same is charged in the statement of comprehensive income - An estimate of the collectible amount of trade accounts receivables is made when collection of the full amount is no longer probable . For individually significant amounts , this estimation is performed on an individual basis . Amounts which are not individually significant , but which are past due , are assessed collectively and a provision applied according to the length of time past due , based on historical recovery rates .

- Inventories are held at the lower of either cost or net realizable value . When inventories become old or obsolete , an estimate is made of their realizable value . For individually significant amounts this estimation is performed on an individual basis . Amounts which are not individually significant , but which are old or obsolete , are assessed collectively and a provision applied according to the inventory type and the degree of aging or obsolescence , based on historical selling prices.

- Management reviews periodically the tangible and intangible assets in order to assess the amortization and depreciation for the year based on the useful life and future economic benefits . Any impairment is taken to the statement of comprehensive income.

5- Significant accounting policies

Below used accounting policies in preparation of financial statements, these policies is applying in the years appear in financial statements.

Changes in accounting policies

- * Deferred tax assets and liabilities arising from a single transaction - amendments to IAS 12.
- * Sale or contribution to assets between an investor and his subsidiary or joint venture -
Amendments to IFRS 10 and IAS 28, effective date not yet specified, allows for early application.

In the opinion of the management, the new standards, amendments and interpretations did not have a material impact on the company during the current or future year and on the expected future transactions.

Accounts receivable

Accounts receivable and others are stated at their net realizable value net of a provision for doubtful accounts , bad debts where written off when identified deduct of its stated provision and the collected amounts from debts which identified to revenues .

Impairment of financial assets

The application of IFRS 9 has fundamentally changed the way of calculating the impairment loss for the company through the approach of the forward-looking expected credit losses method. The company records allowances for expected credit losses for all Murabaha financing instruments and debt financial assets that are not held at fair value through the income statement, all of which are referred to (financial instruments).

Equity instruments are not subject to impairment testing under IFRS 9. The expected credit loss allowance is based on the expected credit losses over the life of the asset, unless there has been a significant change in credit risk from the date of inception, the allowance is based on the 12-month expected credit loss.

First Finance Company

Public shareholding company

Amman - The Hashemite Kingdom of Jordan

Notes to the consolidated financial statements

The expected credit loss weighted by the probability of default of the credit exposure within 12 months is part of the expected credit losses over the life of the asset resulting from failure events in financial instruments that can occur within 12 months from the date of the report.

The ECL is calculated for both the lifetime ECL and the 12-month PD for the credit exposure either on an individual basis or on an aggregate basis depending on the nature of the portfolio's financial instruments.

The company has developed a policy to assess, periodically, whether the credit risk of the financial instrument has increased significantly from the date of initial recognition, by taking into consideration the change in the risk of default over the remaining life of the financial instrument.

Based on what was mentioned previously, the company classifies financial assets into the first stage, the second stage and the third stage as shown below:

The first stage: When financial assets are recognized for the first time, the company records a provision based on the expected credit losses with the probability of default for the credit exposure within 12 months. The first stage also includes the financial assets that were reclassified from the second stage.

The second stage: When a significant increase in credit risk occurs from the date of first recognition, the company records an allowance for expected credit loss for the entire life of the credit exposure. The second stage also includes the financial assets that have improved in credit risk and that have been reclassified from the third stage.

The third stage: financing instruments to which the concept of impairment (default) applies, the company calculates the expected credit loss for the entire life of the credit exposure. For financial assets that the company does not have reasonable expectations of recovering either the entire amount or part of it, the book value of the financial assets is reduced, and it is considered as a (partial) cancellation of the financial assets.

Calculation of expected credit losses

The Company calculates ECL based on the weighted average of three scenarios to measure the expected cash shortfall. The cash shortfall is the difference between the cash flows owed to the company in accordance with the contract and the cash flows expected to be collected. The mechanism for calculating expected credit losses and the main elements are explained as follows:

Likelihood of tripping: The probability of default is an estimate of the probability of default over a given time horizon. The default may occur at a specific period during the evaluation period, if the facility has not been canceled beforehand and it is still in the portfolio.

Credit exposure at default: The credit exposure at default is an estimate of the outstanding amount subject to default at a future date, taking into account the expected changes to the amount outstanding after the reporting date, including principal payments and the value of profit.

Loss ratio assuming default: The default loss ratio is an estimate of the loss arising in the event that default occurs at a particular time, and it represents the difference between the contractual cash flows due and the amount that the lender expects to collect from the existence of real collateral. Usually expressed as a percentage of the credit exposure at default.

First Finance Company

Public shareholding company

Amman - The Hashemite Kingdom of Jordan

Notes to the consolidated financial statements

When estimating ECL, the company considers three scenarios (normal scenario, best case scenario and worst case scenario). Each of them is associated with different weights of the probability of default, credit exposure when default, and the percentage of loss assuming default.

The assessment of various scenarios also includes how to recover the defaulted financing, including the probability of processing the non-performing financing and the value of the collateral or the amounts expected to be collected from the sale of the collateral.

Impairment losses are calculated and disclosed separately from the profits and losses resulting from adjusting the total carrying amount of financial assets.

The mechanisms for calculating expected credit losses are summarized as follows:

The first stage: the expected credit losses are calculated with the probability of default for the credit exposure within 12 months as part of the expected credit losses over the life of the asset, and therefore the company calculates the provision from the probability of default on the financial instruments within 12 months after the date of the report. These hypothetical 12-month expected probabilities are applied to the amount of credit exposure at default multiplied by the loss ratio assuming default, and this calculation is made for each of the three scenarios as described above.

The second stage: When a significant increase in credit risk occurs from the date of initial recognition, the company calculates an allowance for expected credit loss for the entire life of the credit exposure, and the mechanism for calculating the allowance is similar in the same way described above, including using different scenarios, but the probability of default is used and Credit exposure for the entire life of the financial instrument.

The third stage: For financial assets to which the concept of impairment (default) applies, the company calculates the expected credit loss for the entire life of the credit exposure, and the mechanism for calculating the provision is similar to the method used in the second stage, and the probability of default is determined at 100% and the loss ratio is assuming greater default of those applied in the first and second stages.

Warranty contracts: The company's obligation for each guarantee is measured by the largest amount, either the amount recognized when measuring, minus the cumulative amortization recognized in the income statement, or as an allowance for expected credit losses. Therefore, the Company estimates the expected credit losses based on the present value of the payments to compensate the holder for the credit losses incurred. The cash shortfall is discounted at the adjusted rate of return associated with the amount outstanding, and it is calculated using the weighted average of the three scenarios. Expected credit losses related to guarantee contracts are recognized in provisions.

Debt instruments measured at fair value through other comprehensive income

The expected credit losses of debt instruments measured at fair value through other comprehensive income do not reduce the carrying amount of the financial assets in the statement of financial position, which are shown at fair value. Instead, an amount equal to the provision that would arise if the financial assets were measured at amortized cost is recognized in other comprehensive income, and appears as an accumulated impairment with a corresponding cost of profit and loss. The cumulative losses recognized in items of other comprehensive income are recycled to the income statement when the assets are derecognised.

Notes to the consolidated financial statements

Outlook for information

In the expected credit loss model, the company relies on a wide range of future information used as inputs, such as the increase in gross domestic product, unemployment rates, central bank rates of return, international oil price indicators and global market performance indicators. The inputs and models used in calculating expected credit losses may not include all market characteristics as at the date of the financial statements. As a result, qualitative adjustments are sometimes made as temporary adjustments when there are significant differences.

Warranties Evaluation

For the purposes of mitigating credit risk, the Company uses collateral, where possible. There are many forms of cash guarantees, securities, letters of credit, real estate, receivables, inventory and other non-financial assets, and credit improvement agreements. Collateral, unless redeemed, is not recorded in the company's statement of financial position. However, the fair value of the collateral affects the calculation of the company's expected credit losses. They are generally evaluated, as a minimum, upon initial recognition and are re-evaluated periodically.

To the extent possible, the Company uses active market data to value financial assets held as collateral. Other financial assets that do not have an active market are valued using business models. Non-financial collateral, such as a real estate collateral, is valued based on data provided by third parties such as mortgage evaluators or based on housing price indices.

Refundable Warranties

The company's policy is to determine whether it is preferable to use the recovered asset in the company's business or sell it. The assets to be used in the company's activity are transferred to the fixed assets category and are recognized at the recoverable amount or net book value, whichever is lower. As for the collateral to be sold as a better option, it is transferred to the category of assets held for sale at its fair value, and at fair value less selling cost of non-financial assets on the maturity date as per the company's policy.

Depending on the company's business, the company redeems property or other assets in its trading portfolio, but it appoints outside agents to recover its value, generally through auctions, to settle unpaid debts. Any excess funds from the sale of collateral will be returned to the clients/borrowers. As a result, repossessed collateral residential properties are not recorded in the statement of financial position.

Write off the debt

Financial assets are written off either partially or completely only when the company ceases to recover. In the event that the amount written off is greater than the provision for accumulated losses, the difference is treated as an addition to the provision that is applied against the total book value. Subsequent recoveries are charged to the accumulated credit loss expense.

Notes to the consolidated financial statements

Financial assets at fair value through income

Variation of changes in fair value for financial assets is recording through income statements

Financial assets at fair value through income statement appear in fair value which had market prices in active markets.

Financial assets at fair value through comprehensive income

Financial assets at fair value through comprehensive income are non derivative financial assets, the purpose of the acquisition is to keep them available for sale and not to trade or keep them until maturity.

The differences in the change in fair value of financial assets carried at fair value are recorded through the statement of comprehensive income.

Financial assets at fair value through comprehensive income that is available to quoted market prices in active markets at fair value, net of accumulated impairment losses in the fair value appear.

Gains and losses arising from differences foreign currency debt instruments that bear interest within the specified financial assets at fair value through comprehensive income transfer register, while the registration of foreign exchange rate changes ownership of the tools included in the cumulative change in fair value in equity.

If the company did not adopt the recognition of the fair value changes of financial assets in equity instruments in the list of other comprehensive income must be an option then these assets are measured at fair value and recognize changes in fair value in the statement of comprehensive income.

Offsetting

Offsetting of fianacial assets and financial liabilities is occurred and the net amount reported in the financial statements when the rights and legally enforceable right to offset the recognized amounts and the bank intends to either settle them on a net basis , or to realize the assets and settle the liability simultaneously

Property, plant & equipments

Property, plant & equipments are recorded at cost and depreciated (except lands) over its estimated useful lives under the **straight line** method by using annual depreciation rates as follows:

Computer hardware and software	20-25	Vehicles	15
Furniture & fixtures	10	Decorations	7.5

First Finance Company

Public shareholding company

Amman - The Hashemite Kingdom of Jordan

Notes to the consolidated financial statements

An assets carrying amounts is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount , the impairment record in statement of comprehensive income .

The expected production life for assets is reviewed at end of the year , whenever ther are changes between the expected life and the estimated , the depreciation method is changed to depreciate on net book value based on the remaining production life after re-estimation from the year re-estimated on .

When there are no expected economic benifits from usage , that item will be written down immediately .

Intangible assets

Intangible assets, which have finite useful lives, are amortized over their useful lives. Amortization is recognized in the statement of income;however, intangible assets whithout define useful lives should not be amortized and are required to be tested for impairment as of the date the financial statement. Impairment loss shall be recognized in the statement of income.

Intangible assets arising from company operation are not capitalized and should be recognized in the statement of income when incurred.

Intangible assets are assessed at each reporting date to determined whether there is any objective evidence that they are impaired as well as the useful lives of the intangible assets are annually reassessed and any adjustments raised are recognized in the susequent events.

The amortization expenses is recognized in the statement of income on a straight line basis over the estimated useful life of each item of intangible assets. Intangible assets are stated at cost less accumulated amortization and any accumulated impairment loss. They are amortized annually of **20%**.

Real estate investments

Real estate investment is real estate that is acquired either to earn rental income or to increase its value or both, but not for the purpose of selling it through the company's normal activities, and it is not used in the production or supply of goods or services or for administrative purposes.

Real estate investments are shown initially at cost, and their fair value is disclosed in the notes to the financial statements, which are estimated annually by an independent real estate expert based on the market prices of those real estate within an active real estate market.

Real estate investments are recognized as assets only if it is probable that future economic benefits associated with them will flow to the company and the cost of real estate investments can be measured reliably and are initially recorded at their cost including transaction costs in the initial measurement. Real estate investments are treated according to the cost model minus the estimated costs of completing the sale.

It is depreciated with the exception of (land) when it is ready for use over its expected useful life using the **straight-line** method and in percentages of **4%** for buildings.

First Finance Company

Public shareholding company

Amman - The Hashemite Kingdom of Jordan

Notes to the consolidated financial statements

The right to benefit from the assets

The company recognizes the right to use the assets on the start date of the lease contract (the date on which the asset is usable), the right to use asset is recognized at cost, after deducting the accumulated depreciation and impairment losses, and the value is adjusted upon re-evaluation of the lease obligations.

The right-of-use principal cost includes the value of the recognized rental liability, in addition to the initial direct costs incurred, and lease payments made on or before the contract commencement date, less any incentives received related to the lease. In the event that the company is not certain of obtaining ownership of the leased asset at the end of the contract period, the value of the right to use the recognized asset is depreciated on a straight-line basis over the extent of the asset's productive work or the lease period, whichever is less. Right-of-use assets are subject to an impairment test.

Lease contract liabilities

On the commencement date of the lease, the company recognizes lease obligations at the present value of the lease payments to be made during the term of the lease. Rent payments include fixed payments (which include payments that are in substance considered fixed lease payments) minus rent incentives payable, variable lease payments based on agreed indicators or rates according to contract terms, and amounts expected to be collected under residual value guarantees. The lease payments also include the value owed upon exercising the purchase option that the company is certain to exercise and the value of the lease termination fines, if the company intends to exercise the termination option in accordance with the terms of the contract.

Variable lease payments that are not based on agreed indicators or rates in accordance with the terms of the contract are recognized as expenses in the period in which the event or condition that leads to the payment of those amounts.

When calculating the present value of lease payments, for the purposes of discounting future lease payments, the company uses the borrowing rate at the commencement of the lease if the interest rate implicit in the lease is not determinable. Subsequently, the rental liability is increased by the amount of interest accrued and reduced by the amount of actual rental payments. In addition, the book value of the lease liability is re-measured if there is any amendment or change to the lease term, or when any change occurs to the payments in its content, which are considered fixed rental payments or when the valuation related to the purchase of the asset changes.

Short-term leases and low-value leases

The company applies the exemption related to the recognition of short-term leases to some short-term leases (contracts with a duration of 12 months or less from the start date and does not include the option to purchase the asset). The company also applies the exemption related to leases for low-value assets to some leases for assets deemed to be of low value. Lease payments for short-term leases and low-value assets leases are recognized as expenses on a straight-line basis over the term of the lease.

First Finance Company

Public shareholding company

Amman - The Hashemite Kingdom of Jordan

Notes to the consolidated financial statements

Assets devolved to the company in payment of outstanding debts

The assets devolved to the company appear in the statement of financial position at the value transferred to the company or the fair value, whichever is lower, and they are re-valued on the date of the financial statements at fair value individually, and any decrease in their value is recorded as a loss in the income statement, and the increase is not recorded as revenue. The subsequent increase is recorded in the income statement to the extent that it does not exceed the impairment value that was recorded previously.

Accounts payable & accrued amounts

The accounts Payable and accrued amounts are recognized upon receipt of the goods by the company, whether billed by the supplier or not.

Fair value

The closing prices (purchase of assets / sale of liabilities) on the date of the financial statements in active markets represent the fair value of financial instruments and derivatives that have market prices.

In the event that declared prices are not available, or there is no active trading of some financial instruments and derivatives, or market inactivity, their fair value is estimated in several ways, including:

- Comparing it with the current market value of a financial instrument that is very similar to it.
- Analyzing future cash flows and discounting the expected cash flows at a rate used in a similar financial instrument.
- Options pricing models.
- Evaluation of long-term financial assets and liabilities that do not accrue interest according to the cash flow discount and according to the effective interest rate, and the discount / premium is amortized within the interest income received / paid in the statement of comprehensive income for the year.

Valuation methods aim to obtain a fair value that reflects market expectations and takes into account market factors and any expected risks or benefits when estimating the value of financial instruments. In the event that there are financial instruments whose fair value cannot be measured reliably, they are shown at cost after deducting any impairment in their value.

Date of financial assets recognized

Purchases and sales financial assets are recognized on the trade date (the date on which the company commits its self to purchase or sell the assets) .

First Finance Company

Public shareholding company

Amman - The Hashemite Kingdom of Jordan

Notes to the consolidated financial statements

Revenues recognition

The company generates revenue according to IFRS 15 using the following five-step model:

The first step: determining the contract with the customer

A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets standards for each contract that must be fulfilled.

The second step: define performance obligations

A performance obligation is a promise in a contract with a customer to transfer a good or perform service to a customer

Step Three: Determine the transaction price

The transaction price is the amount of the consideration that the company expects to receive in exchange for transferring the goods or services promised by the customer except for amounts collected on behalf of third parties.

The fourth step: allocating the transaction price

For a contract that contains more than a performance obligation, the company distributes the transaction price to each performance obligation in an amount that specifies the corresponding amount that the company expects to obtain in return for fulfilling each performance

The fifth step: recognition of revenue

The company generates revenue when or whenever it fulfills the performance obligation by transporting goods or implementing the services promised by the customer under the contract.

Other revenues recognition

Other revenues are taken to income statement according to accrual basis.

Dividends of securities gains

The dividends of securities gains are recognized when declared by the general assembly of the companies invested in .

Provisions

Provisions are recognized when the company has a present legal or constructive obligation as a result of past events , it is probable that an outflow or resource will be required to settle the obligation , and a reliable estimate of the amount can be made . Where the company expect a provision to be reimbursed , for example under an insurance contract , the reimbursed is recognized as a separate asset but only when the reimbursement is virtually certain .

Treasury Stock

Treasury stock are recorded at cost and the treasury shares account appears minus the total shareholders' equity.

First Finance Company

Public shareholding company

Amman - The Hashemite Kingdom of Jordan

Notes to the consolidated financial statements

Income tax

Payable tax expenses are calculated on the basis of taxable profits in accordance with Income Tax Law No. 38 of 2018 and International Accounting Standard No. 12, which requires the recognition of deferred taxes resulting from time differences in the fair value reserve, which may result in the company having deferred tax liabilities.

Tax expense represents the amounts of tax payable and tax deferred.

Due taxes are calculated on the basis of taxable profits. Taxable profits differ from profits declared in the income statement because the declared profits include non-taxable revenues or expenses that are not deductible in the fiscal year but in subsequent years, or accumulated losses that are taxable, or items that are not subject or acceptable. Downloading is for tax purposes.

Deferred taxes are the taxes expected to be paid or recovered as a result of temporary time differences between the value of assets or liabilities in the financial statements and the value on which the tax profit is calculated.

Deferred taxes are calculated using the liability method in the statement of financial position. Deferred taxes are calculated according to the tax rates that are expected to be applied when the tax liability is settled or deferred tax assets are realized.

The balance of deferred tax assets is reviewed at the date of the financial statements and is reduced in the event that it is expected that it will not be possible to benefit from those tax assets in whole or in part.

Impairment of non-financial assets

On the date of preparing the financial statements, the company assesses whether there is evidence that the asset is impaired. If there is any evidence of this, or when annual impairment testing is required, the Company assesses the asset's recoverable amount. The asset's recoverable amount is its fair value or cash-generating unit less costs to sell and its value in use, whichever is higher and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or the company's assets.

When the carrying amount of an asset or cash-generating unit exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the fair value in use, the future cash flows are discounted to their present fair value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account, if available. If it is not possible to identify such transactions, the appropriate valuation form is used. These calculations are corroborated by multiples of share price of publicly traded subsidiaries or other available fair value indicators.

foreign currency translation

Foreign currency transactions are translated into Jordanian Dinars at the exchange rates prevailing at the date of transaction. Assets and liabilities expressed in foreign currencies are translated into Jordanian Dinars at the exchange rates prevailing as at the balance sheet date. Exchange differences arising from these translations are included in the statement of income.

29- **Risk management**

Credit risks

Credit risk relates to the risk of the other party failing to fulfill its contractual obligations, causing losses to the company. The company follows the policy of dealing with credit-qualified parties, in addition to obtaining adequate guarantees, where appropriate, in order to mitigate the risk of financial losses resulting from non-fulfillment of obligations.

The company deposits cash and income with reputable financial institutions and appropriate credit. Concentration of credit risk appears when customers are operating in the same activity, in the same geographical area, or have the same economic characteristics, and all of this may affect their ability to meet their contractual obligations due to their being affected by the same political and economic changes. Concentration of credit risk represents the company's sensitivity to developments affecting a particular industry or geographic area.
