REPORT ON REVIEWING THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

To the President and Members of the Board of Directors
Jordanian for Developing and Financial Investment Company
(Public Shareholding Company)

Introduction

We have reviewed the accompanying Interim Consolidated Statement of Financial Position of Jordanian for Developing and Financial Investment Company (P.L.C) as of March 31, 2025, and the related statements of Interim Consolidated Comprehensive Income, shareholders' equity and cash flows for the period then ended. The management is responsible of preparing and presenting company's financial statements in accordance with International Accounting Standard No. 34 (Interim Financial Reporting) which is an integral part of International Financial Reporting Standards. Our responsibility is limited to issue a conclusion on these interim consolidated financial statements based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor". This standard requires that we plan and perform the review to obtain reasonable assurance as to whether the interim consolidated financial statements are free of material misstatement. Our review is primarily limited to inquiries of the Company's accounting and financial departments personnel as well as applying analytical procedures of financial data. The range of our review is narrower than the broad range of audit procedures applied according to International Auditing Standards. Accordingly, obtaining assurances and confirmations about other significant aspects checked through an audit procedure was not achievable. Hence, We do not express an opinion regarding the matter.

Modification paragraph

1- The company did not take a provision on account of other receivables with an amount of 454,360 JD as on March 31, 2025.

2- The impairment test did not conducted on the intangible assets (prepaid cards systems and software) with a value of 1,771,000 JD as on March 31, 2025 define the value of impairment.

3- The subsidiary company (Mazaya Investment Payment Company) has not practiced any operational activities since the Company's establishment to date likewise, the company's management does not have any future plans to operate this company, which means that there will be no cash flow in the near future, which indicates that there is doubt in the ability of the parent company to continue its business in the short and long terms.

Conclusion

Based on our review, except what was mentioned in modification paragraph, nothing has come to our attention that causes us to be believed that the accompanying interim financial statements do not give a true and fair view in accordance with International Accounting Standard No. 34.

1. ORGANIZATION AND ACTIVITY

The Jordanian for Development and Financial Investment Company (previously: Jordan Industries and Sulfur Company). At its Extraordinary Meeting held on January 22, 2015, the Company changed its name from Jordan Industries and Sulfur Company to Jordan for Development and Financial Investment Company and the procedures were completed by the Ministry of Industry and Trade on January 29, 2015 and it's a Jordanian limited public shareholding company (the "Company") registered in the register of public shareholding companies Limited on August 13, 1981 under No. 158 with the Controller of Companies in the Ministry of Industry and Trade. the Company's authorized and paid up capital is 3,000,000 JD divided into 3,000,000 shares each for of 1JD.

The principal activity of the Company is to participate in and to own shares and shares in other companies with similar goals, projects, buying similar companies and owning companies.

The interim consolidated financial statements include the financial statements of the following subsidiary company (Mazaya Investment Payment Company L.L.C) registered in the Hashemite Kingdom of Jordan on March 10, 2009 with 100% ownership. The Company's main activity consists of credit consultations, Import and export, shareholding and participation in other companies, buying and selling shares and bonds for the company's purposes other than financial intermediation, owning movable and immovable assets for the company purposes, selling prepaid cards for telecommunication and internet services, borrowing from banks and financial institutions. The implementation of the company's goals, the collection of funds and debts other than bank debt to serve the company's interest, development and marketing of accounting systems, development of business solutions and software, organization of exhibitions and conferences, business services (except dealing with international exchanges) and agent and commercial broker except in foreign stock exchange .

2. New and Amended International Financial Reporting Standards

The following new and amended standards and interpretations have not yet become effective	It is valid for annual periods beginning on or after
Non-Fungibility of Exchange Rates (Amendments to IAS (21))	January 1, 2025
Presentation and Disclosure in Financial Statements (Amendments to IFRS (18))	January 1, 2027
Investments in Associates and Joint ventures (Amendments to IAS (28) and IFRS (10))	The implementation has been postponed indefinitely.

Management anticipates that these new standards, interpretations and amendments will be adopted in the Company's financial statements as and when they are applicable and adoption of these new standards, interpretations and amendments, may have no material impact on the financial statement of the Company in the period of initial application.

**JORDANIAN FOR DEVELOPING AND FINANCIAL INVESTMENT COMPANY
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)
FOR THE PERIOD ENDED MARCH 31, 2025
(EXPRESSED IN JORDANIAN DINAR)**

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, "Interim Financial Reporting".

The interim consolidated financial statements are presented in Jordanian Dinar, since that is the currency in which the majority of the Company's transactions are denominated.

The interim consolidated financial statements have been prepared on historical cost basis.

The interim consolidated statements do not include all the information and notes needed in the annual consolidated financial statements and must be reviewed with the ended financial statement at December 31, 2024, in addition to that the result for the three months ended in March 31, 2025 is not necessarily to be the expected results for the financial year ended December 31, 2025.

Significant accounting policies

The accounting policies used in the preparation of the interim consolidated financial information are consistent with those used in the audited financial statements for the period ended December 31, 2024.

Basis of consolidating interim financial statements

The interim Consolidated Financial Statements incorporate the financial statements of Jordanian For Developing And Financial Investment Company (Public Shareholding Company) and the subsidiaries controlled by the Company.

Control is achieved where the Company:

- Ability to exert power over the investee.
 - Exposure, or rights, to variable returns from its involvement with the investee.
 - Ability to exert power over the investee to affect the amount of the investor's returns.
- The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described in the accounting policy for subsidiaries above.

When the Company has less than a majority of the voting, The Company shall have control over the investee when the voting rights sufficient to give it the ability to direct relevant activities of the investee individually.

When The Company reassesses whether or not it controls an investee, it consider all the relevant facts and circumstances which includes:

- Size of the holding relative to the size and dispersion of other vote holders
- Potential voting rights, others vote-holders, and Other parties
- Other contractual rights
- Any additional facts and circumstances may indicate that the company has, or does not has, the current ability to direct the activities related to the time needed to make decisions, including how to vote at previous shareholders meetings.

**JORDANIAN FOR DEVELOPING AND FINANCIAL INVESTMENT COMPANY
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)
FOR THE PERIOD ENDED MARCH 31, 2025
(EXPRESSED IN JORDANIAN DINAR)**

The consolidation process begins when the company's achieve control on the investee enterprise (subsidiary), while that process stops when the company's loses control of the investee (subsidiary). In particular revenue and expenses of subsidiaries acquired or disposed of during the year are included in the consolidated income statement, and the consolidated comprehensive income statement from the effective date of acquisition and up to the effective date of which it loses control of a subsidiary company.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the parent company.

All intra-entity transactions, balances, income and expenses are eliminated in full on consolidation.

Equity instruments at FVTOCI

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in the cumulative changes in fair value of securities reserve: The cumulative changes or loss will not be reclassified investments. But reclassified to retained earnings. The Company has designated all instruments that are not held for trading as at FVTOCI.

Dividends on these investments in equity instruments are recognized in profit or loss when the Company right to receive the dividends is established, unless the dividends clearly represent a recovery of a part of the cost of the investments. Other net gains and losses are recognized in OCI and are never reclassified to profit or loss.

The Company assesses the classification and measurement of the cash flow characteristics of the contractual asset and the Company's business model for managing the asset.

For an asset to classified and measured at amortized cost or at FVTOCI, is contractual terms should give rise to cash flows that are solely represent payments of principal and interest on the principal outstanding (SPPI).

At initial recognition of a financial asset, the Company determines whether newly recognized financial assets are part of an existing business model or whether they reflect the commencement of a new business model. The Company reassess its business models each reporting period to determine whether the business models have changed since the preceding period. For the current and prior reporting period the Company has not identified a change in its business models.

When a debt instrument measured a FVTOCI is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss. In contrast, for an equity investment designated as measured FVTOCI, the cumulative gain/loss previously recognized in OCI is not subsequently reclassified to profit or loss but transferred within equity.

Debt instruments that are subsequently measured at amortized cost or FVTOCI are subject to impairment.

**JORDANIAN FOR DEVELOPING AND FINANCIAL INVESTMENT COMPANY
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)
FOR THE PERIOD ENDED MARCH 31, 2025
(EXPRESSED IN JORDANIAN DINAR)**

Reclassifications

If the business model under which the Company holds financial assets changes. The financial assets affected are reclassified. The classification and measurement requirements related to the new category apply prospectively from the first day of the first reporting period following the change in business model that results in reclassifying the Company's financial assets. During the current financial year and previous accounting period, there was no change in the business model under which the Company holds financial assets and therefore no reclassifications were made.

Impairment

IFRS 9 replaces the "incurred loss" model in IAS 39 with an expected credit loss model (ECLs). The Company recognizes loss allowance for expected credit losses on the following financial instruments that are not measured at FVTPL

- Cash and bank balances;
- Trade and other receivables;
- Due from related party.

With the exception of purchased or originated credit impaired (POCI) financial assets (which are considered separately below), ECLs are required to be measured through a loss allowance at an amount equal to:

- 12 Month ECL, i.e. lifetime ECL that results from those default events on the financial instrument that are possible within 12 months after the reporting date (referred to as stage1); or
-
- Full lifetime ECL, i.e. Lifetime ECL that results from all possible default events over the life of the financial instruments, (referred to as stage2 and stage3).

A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL.

The Company has elected to measure loss allowances of cash and bank balances, Trade and other receivables, and due from a related party at an amount equal to life time ECLs.

ECLs are probability-weighted estimate of the present value of credit losses. These are measured as the present value of the difference between the cash flow to the Company under the contract and the cash flows that the Company expects to receive arising from weighting of multiple future economic scenarios. Discounted at the asset's EIR.

Loss allowance for financial investments measured at amortized costs are deducted from gross carrying amount of assets. For debt securities a FVTOCI, the loss allowance is recognized in the OCI, instead of reducing the carrying amount of the asset.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue costs or effort. This includes both quantitative and qualitative information and analysis based on the previous company experience and on the available credit score including forward-looking information.

**JORDANIAN FOR DEVELOPING AND FINANCIAL INVESTMENT COMPANY
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)
FOR THE PERIOD ENDED MARCH 31, 2025
(EXPRESSED IN JORDANIAN DINAR)**

Categories of financial assets, assets that are assessed not to be impaired individually are. in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Company's past experience of collecting payments, an increase in the number of delayed payments in the portfolio as well as observable changes in national or local economic conditions that correlate with default on receivables.

Impairment losses related to cash and bank balances, trade and other receivables and due from a related party, are presented separately in the interim consolidated statement of income and other comprehensive income.

The Company considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of the grade of the investment.

Measurement of ECL

The Company employs statistical models for ECL calculations. ECLs are a probability-weighted estimate of credit losses. For measuring ECL under IFRS 9, the key input would be the term structure of the following variables.

- Probability of default (PD);
- Loss given default (LGD); and
- Exposure at default (EAD).

These parameters will be derived from our internally developed statistical models and other historical data. They will be adjusted to reflect forward – looking information.

Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial assets have occurred. Credit-impaired financial assets are referred to stage 3 assets. At each reporting date, the Company assesses whether financial assets carried at amortized costs and debt securities at FVTOCI at credit-impaired. A financial asset is credit impaired when one or more events that have a detrimental impact in the estimated future cash flows of the financial asset have occurred.

DE-recognition of financial assets

The Company de-recognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On DE recognition of a financial asset measured at amortized cost or measured at FVTPL, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss.

On DE recognition of a financial asset that is classified as FVTOCI, the cumulative gain or loss previously accumulated in the cumulative changes in fair value of securities reserve is not reclassified to profit or loss, but is reclassified to retained earnings.

**JORDANIAN FOR DEVELOPING AND FINANCIAL INVESTMENT COMPANY
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)
FOR THE PERIOD ENDED MARCH 31, 2025
(EXPRESSED IN JORDANIAN DINAR)**

Presentation of allowance for ECL are presented in the interim consolidated financial information

Loss allowances for ECL are presented in the interim consolidated financial information as follows:

For financial assets measured at amortized cost (loans and advances, cash and bank balances): as a deduction from the gross carrying amount of the assets.

For debt instruments measured at FVTOCI no loss allowance is recognized in the interim consolidated financial position statement as the carrying amount is at fair value. However, the less allowance is included as part of the revaluation amount in re-evaluation reserve and recognized in other comprehensive income.

Expenses and revenue recognition

The Revenue is recognized when there is a probability of economic benefits for the company in result of interchangeable process that's its measurable in a reliable way.

The expenses are recognized in accrual basis.

Critical accounting judgments and key sources of estimation uncertainty

The preparation of interim consolidated financial statements requires management to make judgments estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing these interim consolidated financial statements, the significant Judgments made by management in applying the Company accounting policies and the key sources of estimation uncertainty were the same as those that applied to the interim consolidated financial statements.

Critical judgments in applying the Company's accounting policies in respect of IFRS 9

Business model assessment:

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how Company s of financial assets were managed together to achieve a particular business objective. This assessment includes judgments reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of f he assets are compensated. Monitoring is part of the Company s continues assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets.

Significant increase of credit risk

ECLs are measured as an allowance equal to 12-month ECL for stage1 assets, or lifetime ECL assets for stage 2 or stage 3 assets. An asset moves to stage two when its credit risk has increased significantly since initial recognition. IFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased, the Company takes into account qualitative and quantitative reasonable and supportable forward-looking information.

**JORDANIAN FOR DEVELOPING AND FINANCIAL INVESTMENT COMPANY
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)
FOR THE PERIOD ENDED MARCH 31, 2025
(EXPRESSED IN JORDANIAN DINAR)**

Establishing Company's assets with similar credit risk characteristics

When ECLs are measured on a collective basis, the financial instruments are Company collected on the basis of shared risk characteristics (e.g., instrument type, credit risk grade, collateral type, date of initial recognition, remaining term to maturity, industry, geographic location of the borrower, etc.). The Company monitors the appropriateness of the credit risk characteristics on an ongoing basis to assess whether they continue to be similar. This is required in order to ensure that should credit risk characteristics change there is appropriate re-segmentation of the assets. This may result in new portfolios being created or assets moving to an existing portfolio that better reflects the similar credit risk characteristics of that Company of assets. Re-segmentation of portfolios and movement between portfolios is more common when there is a significant increase in credit risk (or when that significant increase reverses) and so assets move from 12-month to lifetime ECLs, or vice versa, but it can also occur within portfolios that continue to be measured on the same basis of 12-month or lifetime ECLs but the amount of the ECLs changes because the credit risk of the portfolios differ.

Models and assumptions used

The Company uses various models and assumptions in measuring fair value of financial assets as well as in estimating ECL. Judgment is applied in identifying the most appropriate model for each type of asset, as well as for determining the assumptions used in these models, including assumptions that relate to key drivers of credit risk.

Key sources of estimation uncertainty in respect of IFRS 9

The following are key estimations that the management has used in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognized in interim consolidated financial statements.

Establishing the number and relative weightings of forward-looking scenarios for each type of product /market determining the forward-looking information relevant to each scenario: When measuring ECL the Company uses reasonable and supportable forward-looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

Probability of Default

PD constitutes a key input in measuring ECL. PD is an estimate of the likelihood of Default likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

Loss Given to Default

LGD is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Expenses

Expenses are shown in the income statement according to their nature, which mainly consists of salaries, wages, depreciation and rent, and other expenses are classified and shown as other administrative and operating expenses.

**JORDANIAN FOR DEVELOPING AND FINANCIAL INVESTMENT COMPANY
(PUBLIC SHAREHOLDING COMAPNY)**

**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)
FOR THE PERIOD ENDED MARCH 31, 2025
(EXPRESSED IN JORDANIAN DINAR)**

Accounts Receivables

Accounts receivable are stated at original invoice amount less provision for any uncollectable amounts. An estimate for impairment of account receivable is made when there is subjective evidence that the collection of the full amount is no longer probable.

Accounts Payable and Accruals

Accounts payable are stated at the obligation amounts for received services and goods, whether billed by the suppliers or not.

Investment in credit cards

Investment in the credit cards system appears at cost and any additions to finance these investments are capitalized.

Segment reporting

A business segment is a group of assets and operation engaged in providing products or services that are subject to risks and returns that are different from those of other business segments, and segment is engaged in providing products or services within a particular economic environment.

Geographical segment is associated in providing products in particular economic environment subject to risks and returns that are differed from those for sectors to work in economic environment.

Offsetting

Financial assets and financial liabilities are offset, and the net amount is reflected in the statement of financial position only when there are legal rights to offset the recognized amounts, the Company intends to settle them on a net basis, or assets are realized and liabilities settled simultaneously.

Property and Equipments

Property and equipment are stated at cost less accumulated depreciation and any impairment in value. Depreciation is calculated on a straight-line basis except power plant and equipment and machinery (melting furnace) depreciation is calculated on production capacity basis, the depreciation percentage for the assets as follows:

	<u>Annual depreciation rate</u>
Furniture	10%-20%
Decorations	10%-20%
Devices and systems	10%-20%
Air conditioning	10%-20%

Useful lives and the depreciation method are reviewed periodically to make sure that the method and depreciation period appropriate with the expected economic benefits of property and equipment. Impairment test is performed to the value of the property and equipment that appears in the Interim ConsolidatedStatement of Financial Position when any events or changes in circumstances shows that this value is non-recoverable.

In case of any indication to the low value, Impairment losses are calculated according to the policy of the low value of the assets.

At any subsequent exclusion of property and equipment, the value of gains or losses resulting recognized, Which represents the difference between the net proceeds of exclusion and the value of the property and equipment that appears in the Interim ConsolidatedStatement of Financial Position, Gross Profit and loss.

**JORDANIAN FOR DEVELOPING AND FINANCIAL INVESTMENT COMPANY
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)
FOR THE PERIOD ENDED MARCH 31, 2025
(EXPRESSED IN JORDANIAN DINAR)**

Income tax

The company is subject to Income Tax Law and its subsequent amendments and the regulations issued by the Income Tax Department in the Hashemite Kingdom of Jordan and provided on accrual basis, Income Tax is computed based on adjusted net income. According to International Accounting Standard number (12), the Company may have deferred taxable assets resulting from the differences between the accounting value and tax value of the assets and liabilities related to the provisions, these assets are not shown in the financial statements since it's immaterial.

Foreign currency translation

Foreign currency transaction are translated into Jordanian Dinars at the rates of exchange prevailing at the time of the transactions. Monetary assets and liabilities denominated in foreign currencies at the consolidated financial position are translated at the exchange rates prevailing at that date. Gains and losses from settlement and translation of foreign currency transactions are included in the interim consolidated comprehensive income statement.

4. FINANCIAL INSTRUMENTS

Management of share capital risks

The Company manages its capital to make sure that the Company will continue when it is take the highest return by the best limit for debts and shareholders equity balances.

The management of the financial risks

The Company's activities may be exposed mainly to financial risks arising from:

Management of the foreign currencies risks

The Company is not exposed to significant risks associated with foreign currency change and therefore no effective management of such exposure is required.

Management of the interest price risks

Risk related to interest rate result mainly from borrowing money at floating interest rates and short term deposits at fixed interest rates.

The Company is not exposed to interest rate risk due to the absence of any borrowed funds or deposits as of the date of the interim consolidated financial statements.

Other price risk

The Company is exposed to price risk arising from its investments in the equity of other companies. The Company maintains investments in the equity of other companies for strategic purposes and not for trading purposes and the Company does not actively trade in those investments.

Credit risk management

The credit risks represent in one part of the financial instruments contracts has not obligated to pay the contractual obligations and cause of that the Company is exposing financial losses, However, there are no any contracts with any other parties so the Company doesn't expose to different types of the credit risks, The significant credit exposed for any parties or group of parties that have a similar specification. The credit risks that are resulting from the cash money are specific because the parts that are dealing with it are local banks have good reputations and have been controlled from control parties.

The amounts had listed in the financial statements data represents the highest credit risk expose to the trade accounts receivable and to the cash and cash equivalent.

**JORDANIAN FOR DEVELOPING AND FINANCIAL INVESTMENT COMPANY
(PUBLIC SHAREHOLDING COMPANY)**

**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)
